

Three channel high side smart solid state relay

Features

Type	Channel	R _{DS(on)}	I _{OUT}	V _{CC}
VN450	1 & 2	40 mΩ	10 A	36 V
	3	300 mΩ	2 A	36 V

- Output current (continuous):
10 A (channel 1,2) at T_C = 25 °C
2 A (channel 3) at T_C = 25 °C
- 5 V logic level compatible inputs
- Under voltage shut-down
- Over voltage shut-down
- Thermal shut-down
- Open drain diagnostic outputs
- Very low stand-by power dissipation

Description

The VN450 is a monolithic device made using STMicroelectronics vertical intelligent power technology, intended for driving resistive or inductive loads with one side connected to ground. This device has three independent channels and three diagnostics.

Built-in thermal shut-down protects the chip from over temperature and short circuit.

The control inputs are 5 V CMOS logic level compatible.

The open drain diagnostic outputs indicate shortcircuit (no load) and over temperature status.
